

EXPRESSION OF INTEREST (EOI)

SUPPLIERS TO PROVIDE PERFORMANCE MANAGEMENT SOFTWARE SOLUTIONS

As @ 9 January 2018

Since the adoption of the 2017-22 Corporate Plan, Council is focusing on 5 themes:

1. Our productive region
2. Our happy, healthy and safe region
3. Our united region
4. Our vibrant and naturally beautiful region
5. Our efficient and effective Council

This EOI is very much based on theme 5 and will be achieved by having a software solution that is customer focus, provides future financial sustainability and good governance now and into the future

Any supplier of this performance management solution must consider the following objectives:

1. A track record of service delivery (with references) in Qld local government
2. Be able to integrated with existing corporate business systems
3. High level knowledge and experience on the various roles and responsibilities for Council to manage the performance reporting process.
4. Comply with all relevant Qld legislation
5. Demonstrate accountability and transparency (reporting) to elected members and community
6. Demonstrate continuous improvement
7. Value for money

This solution will incorporate the annual Operational Plan, Budget, monthly and quarterly reporting platforms and finally the main reporting component of the Annual Report.

It must demonstrate a framework that is specific to task, activity. It must be measurable and aligned to key strategic documents and with clear timeframes included to measure performance.

What Council is seeking here is nothing new. It will be up to the supplier to articulate and fill in the gaps what the North Burnett Regional Council is wanting here.

Depending on the EOIs received, Council may then decide to short-list candidates, seek formal quotations and possible on-site presentations.

All or no expressions of interest of interest may be accepted.
