

NORTH BURNETT REGIONAL COUNCIL

Building Information

Non Habitable Buildings and Structures Class 10a

Info Sheet

2

This information sheet explains the requirements for a building permit to construct a shed, garage, carport, domestic patio, verandah, shade structure, deck and the like

A Building Permit -

is a Development Permit to 'Carry Out Building Work', and must be obtained for all building work proposed on any land within the Region. Building work is defined as -

- a) building, repairing, altering, underpinning (whether by vertical or lateral support), moving or demolishing a building or other structure; or
- b) excavating or filling—
 - i) for, or incidental to, the activities mentioned in paragraph (a); or
 - ii) that may adversely affect the stability of a building or other structure, whether on the land on which the building or other structure is situated or on adjoining land; or
- c) supporting (whether vertically or laterally) land for activities as in paragraph (a);
- d) other work regulated under the building assessment provisions, other than Development Assessment Rules.

PLEASE NOTE: Your application may require other approvals, for example town planning approval, Department of Transport and Main Roads or Environmental Protection Agency, Department of Natural Resources and Mines etc.

All development needs to be checked for land use planning issues before submitting a building application. Please contact Council in the first instance on 1300 696 272.

Builders should note that the allotment of land on which a building is proposed to be erected must be in the name of the Owner and registered on Council's rate records at the time of making a building application. No building permits can be issued until the ownership is transferred or advice per Form 1 & 24 is lodged with Council's Administration Section.

CLASSIFICATION

Class 10—non habitable building being a private garage, carport, shed or the like.

SUBMITTING AN APPLICATION

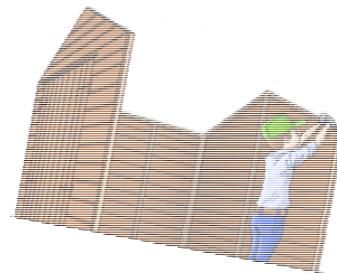

The application is not deemed as being received unless all of the following information is received at the time of submission to Council -

1. **Building Application DA Form 2**—completed in full.
2. **Compliance Assessment for plumbing and drainage and onsite sewerage work Form 1**—completed in full, if applicable
3. **Payment of fees**, as applicable.
4. **Documentation as per attached checklist.**

Plans must be submitted to Council in triplicate and must be of a good drafting standard. If the applicant is not familiar with the requirements of the *Building Act 1975* and the *Building Regulation 2006*, it would be to their advantage to consult a licensed Building Designer, Architect, or other person who has knowledge of the Act and Regulations. Attached at the end of this information pack is a list of consultants known to service the North Burnett region.

A plan is a document that should contain enough information presented in such a way that it is possible to construct the building or structure from it. It should contain information (where applicable) as listed in the attached sheet entitled 'MINIMUM LEVEL OF DETAILS TO BE INCLUDED'.

5. **On Site Sewerage Treatment Unit/Septic Tank/Composting Toilet Applications** are made with the Building Application. Unless otherwise advised, it shall be accompanied by one (1) copy of the Percolation Test Report and three (3) copies of the Effluent Design/Drainage Plan for the proposed sewerage and sullage waste water disposal; (per AS 1547) prepared by a licensed hydraulic engineer or other appropriate person to achieve the requirements of the Percolation Test Report.
6. **Proof of Payment of Portable Long Service Leave Levy (Qleave) Receipt** is required at the time of lodgment of a Building Application where the value (labour and materials) exceeds \$150,000. The payment of this fee is to be made at any Australia Post Office or online at www.qleave.qld.gov.au.
7. **Change of Classification.** Where an application is made to change the classification of a building to one of another classification e.g.. Class 10 (shed) to a Class 1a (dwelling), the new building must be designed and altered to comply with the *Building Regulation 2006* and the *Building Code of Australia* including all the referenced Australian Standards therein. Some concessions apply for existing buildings and in these cases the Applicant should consult with Council's Building Surveyor.
8. **SAA Wind Loading Code AS 1170 - Part 2 Wind Forces.** The North Burnett region is geographically located with part in region A and part in region B (see figure 2.1 AS4055-2006). It is the applicant's responsibility to determine the correct wind rating and if in doubt should retain the services of a Registered Professional Engineer of Queensland (RPEQ).
9. **Energy efficiency** – The North Burnett region is located within **Zone 3** in relation to the energy efficiency requirements of Part 3.12 of the *Building Code of Australia* (BCA) and *Queensland Development Code* (QDC) MP4.1 (sustainable buildings).
10. **Owner Builders** are required to obtain an Owner Builders Permit if the work is \$11,000 or more. If less than \$11,000, a Permit is not required. The Permit number is to be inserted in the allocated space provided on Form 2.
11. **QBCC Insurance** – other than for Owner Builders, proof of payment of Queensland Building Construction Commission (QBCC) statutory insurance scheme must be provided at the time of lodgment of the application, where the value of the building works exceeds \$3,300.

NEED AN OWNER BUILDER PERMIT?

How Do I Apply For A Permit?

Applying for a permit involves completing an application form, paying the permit fee and providing QBCC with proof of identification and specific proof of ownership or sufficient legal interest in the property.

If the value of work (labour and materials) is over \$11,000, you will be required to complete an Owner Builder Course run by a course provider recognised by QBCC. The course must be completed by one of the people on the title of the property unless leasing. An Owner Builder Course Certificate must be less than 5 years old at the time of application. Courses are presented in lecture style or through correspondence. A list of Course providers is available from QBCC offices or QBCC's website www.qbcc.qld.gov.au under Homeowners.

Value of Building Work

It is important that you understand what 'value of building work' means. 'Value of building work' is defined in the QBCC Act as an amount representing the reasonable cost to a consumer of having the work carried out by a licensed contractor on the basis that all building materials are to be supplied by the contractor (whether or not the work is in fact carried out by a licensed contractor on that basis).

This means when you calculate the estimated value of building work you must include the cost of materials and the cost a licensed contractor would charge you for the work.

WARNING - No Insurance Protection!

By becoming an Owner Builder you forfeit your right to QBCC insurance on the building work. QBCC insurance protects consumers who have a contract with an appropriately licensed contractor to perform residential building work. This insurance cover assists consumers in cases where:

- the contractor fails to complete the building work for reasons that are not the consumers fault;
- the contractor fails to rectify defective work; and

- the building suffers from the effects of subsidence or settlement.

As an Owner Builder, your role is that of head or main contractor and you will be personally responsible for dealing with individual subcontractors if there are any problems with workmanship. By contrast, if you were to engage an appropriately licensed contractor to perform the whole job, you would only have to deal with that contractor - they then hold the responsibility of dealing with subcontractors - and if they fail to correct a defect you are able to use the services of QBCC's dispute resolution service and you may be able to claim QBCC's Insurance. This service is not available to Owner Builders.

When you are issued an Owner Builder Permit a notification is entered onto the property title for a minimum of seven years. This is detailed more fully in your permit; however, in some instances it can affect the sale of your property.

Warnings

If—

- (a) building work is carried out on land by a person who is not licensed to carry out that building work; and
- (b) the land is offered for sale within 6 years after completion of the building work; the vendor must, before the contract of sale is signed by the purchaser, give the prospective purchaser a notice containing details of the building work and a warning in the form required by regulation.

If a notice is not given as required by this section, the vendor will be taken to have given the purchaser a contractual warranty (which operates to the exclusion of any inconsistent provision of the contract of sale) that the building work was properly carried out.

GENERAL INFORMATION

1. Compliance for Class 10a Buildings

Class 10a buildings are to comply with the North Burnett Regional Planning Scheme, the *Building Act 1975*, the *Building Regulation 2006*, Volume 2 of the *Building Code of Australia* and all the referenced Australian Standards contained therein.

2. Buildings erected or used unlawfully

Where it comes to the knowledge of a local authority that any building or other structure has been erected or used -

- (a) Without an approval as required by the *Planning Act 2016*; or
- (b) Other than in accordance with the approved plans, specifications and conditions as imposed by the local authority;

a notice pursuant to the *Planning Act 2016* / *Building Act 1975* may be served on the owner of the building or structure to perform such work on the building or structure as is necessary to bring the same into conformity with the *Building Regulation 2006*, or to demolish or remove the same.

3. Novel Design and Materials

If you are contemplating a novel form of construction such as mud brick, post and rail, pole frame, slab hut, log cabin, Cape Cod or the like that cannot be assessed under the Deemed to Satisfy provisions of the Building Code of Australia, it will be necessary to comply with Part 1.2 of the BCA and provide Evidence of Suitability as detailed in this Part. An engineer used to assist in providing the evidence must be a Registered Professional Engineer Queensland (RPEQ).

Also, it will be necessary to submit a certificate of structural adequacy from a practicing RPEQ Engineer with all applications for metal structure and buildings where members used cannot be checked against Codes or Standards available to the Building Certifier.

4. Contamination of Land Act 1991 (as amended)

An application lodged on a restricted site as defined by the Contaminated Land Act 1991 cannot be approved if the application is inconsistent with the limited use or on-site activity of the land specified in the classification.

5. Allotment Surveys and Boundary Pegs

The owner is responsible for determining the boundaries and maintenance of survey pegs on their land. The owner and builder should check that the proposed building or additions are within the building lines before commencing the building work. The nature of the building, conditions of the site, levels and depth of the allotment may make it necessary to resurvey the land and/or the building on the land before building work is commenced. An Identification Survey may be required by the North Burnett Regional Council where survey pegs or building lines cannot identify that the building has been sited to meet the deemed to satisfy solutions of the Queensland Development Code.

6. Land Liable to Flooding

Certain allotments within the North Burnett Region have been identified as land which may be liable to flooding. Information regarding land is available at the Regional Offices.

7. Inspections Required

The Builder/Owner is required to make arrangements with the Building Certifier to carry out inspections that form part of the building approval. **The inspections will be at a time agreed between the Builder/Owner for the work and the Building Certifier inspecting the building work.** Only (1) one inspection for each stage is included in the application fees.

Failure to notify may result in the commencement of enforcement proceedings and may also affect your insurances due to a Certificate of Inspection not being issued. Where considered necessary, that stage of the work may be

required to be taken down or uncovered for inspection purposes.

Generally, inspections are required to be made at the following stages of construction, but the actual inspections required for each project are detailed on the Decision Notice:-

Building Work

- Footings/Slab (and prior to all other concrete pours)
- Framework (prior to covering up any framework)
- Core fill of masonry construction (when reinforcement is in place)
- Final (when all work is complete and all certificates and log books are available)

Plumbing / Drainage Work

- Internal and /or external drains
- Hot and cold plumbing rough in
- Final

HOW LONG WILL IT TAKE FOR MY BUILDING APPLICATION TO BE APPROVED?

Your building application is assessed using the Development Assessment Rules. This system is **MANDATORY** for all local authorities to follow in assessing any type of development application. It is part of the *Planning Act 2016*, which is State Government legislation.

Your building application will be approved based on a number of matters such as:

- The information you provide as part of the application; and
- The relevant forms being completed correctly by you; and
- Payment by you of all the relevant statutory and local government fees; and
- The time lines included in the provisions of the Development Assessment Rules.

Council will follow the Development Assessment Rules process as follows:

1. You will submit your application with the necessary plans, application and statutory fees.
2. Council will check the application to determine if it is properly made and if so accept it. If it is not properly made you will be issued with an action notice and the stated items will need to be submitted. Council has 10 business days to issue this notice. The applicant has 20 business days to respond and lodge the required documentation otherwise your application will be deemed not properly made and will be returned to the applicant with 80% of the paid fees. Council can accept an application if it is not properly made if there are only minor issues involved.
3. If the application is deemed to be properly made and the information that has been submitted is sufficient for the application to be assessed by our Building Surveyors, Council has 35 **business days** from the day it is accepted as a properly made application to make a decision. Provided there are no issues with the application **it should be approved within 35 business days** of being submitted.
4. If the application is deemed to be properly made application and assessment commences, but during this assessment further information is required, a request for information notice can be issued to the applicant. Council has **10 working days** from when the application is accepted to issue an Information Request. The assessment period pauses until the applicant has responded to the Information Request. The applicant has three (3) months to do so. If this time lapses and the applicant has not responded, Council will continue to assess the application, but it is extremely likely that the building application will NOT be approved. Once the information request has been satisfactorily responded to, the clock starts ticking again on the decision making period. Council has 35 business days less any time initially taken to issue the information request to the applicant to issue the decision notice.

MINIMUM LEVEL OF DETAILS TO BE INCLUDED ON THE FOLLOWING DOCUMENTS FOR CLASS 10A BUILDINGS

Site Plan

- Address
- RP/SP description and site area
- Road/Street names and access points (type and width including driveways)
- Boundary dimensions, bearings and easements
- North point
- Boundary clearances and setback dimensions of new building.
- Location and type of retaining walls and/or soil restraint (if any)
- Location/siting of existing buildings and their uses

Floor Plan(s)

- Plans
- Room names
- Dimensions
- Indicate wall construction
- Window location and size
- Design Wind Velocity and bracing requirements
- Roof plans with gutters and downpipes
- Floor finishes if of brittle materials on slab construction.

Elevations

- All elevations showing facades
- Heights
- Roof pitch
- Roof materials
- External claddings
- Door and window type and size
- Correct ground lines including cut and fill
- Overhang dimensions
- Termite treatment (shown at Sections)

Structural

- Referenced sections and details
- Footings and slabs
- Roof construction
- Retaining wall construction
- Certificate of design if relevant (Form 15)
- Footpath crossover if relevant. (to Council's detail u.n.o.)

Other

- Plans showing the Energy Efficiency requirements in accordance with Part 3.12 of the Building Code of Australia for Zone 3.
- Plans showing building sustainability details in accordance with the QDC MP4.1

Sewerage, Sullage and Stormwater Drainage

- Floor plan outline showing drainage
- Site plan locating stormwater lines and downpipes.

NOTE: Each drawing is to have job, page number, title of drawing and original signature of author License details / number of author

CONSULTANTS

The following is a list of consultants who have worked or are currently doing work in the North Burnett Region. Other consultants may be found online or in yellow pages business directory.

NOTE: This list has been compiled to assist applicants. Council does not take responsibility for any errors or omissions and consultants are **NOT** listed in any order of preference. Council does **NOT** offer advice or make recommendations about consultants.

ARCHITECTS

1. Core Architects
HERVEY BAY QLD 4655
Ph: 4128 4466
2. Keystone Architects
MARYBOROUGH QLD 4650
Ph: 4123 1005 Fax: 4123 1001

LICENSED BUILDING DESIGNERS

1. Arthur Martin Design & Drafting

Still need help?

This information sheet summarises the key matters to consider for people considering carrying out development. The process and legal aspects relating to property and development can be complex and confusing. Council's development services staff may be able to help.

Sometimes however it may be advisable for you to obtain your own professional help from a qualified practitioner such as a Lawyer, Surveyor, Town Planner, Architect, Building Designer, or Engineer.

Contact Us

Give us a call for more information about the planning scheme and making an application.

APPLICATION LODGEMENT CHECKLIST

CLASS 1A TO 1B BUILDINGS

This form, completed by the Applicant, is to be lodged with the Building Application. It is the responsibility of the Applicant to ensure that all these details are correct and provided to Council in order to ensure approval of your application. All fees associated with this application to be provided at time of lodgement. Government legislation requires the payment of portable long (Qleave) service entitlements be made prior to issue of Development Permit. Building plans and application will not be accepted by Council until all information as listed below has been submitted.

APPLICANTS NAME:

BUILDING SITE ADDRESS:

MANDATORY DOCUMENTATION AT LODGEMENT		APPLICANT CHECK	COUNCIL CHECK
1.	Completed Form 2 Building Work Details (and others if required)		
2.	Relevant local authority application fee.		
3.	1 copy of the QBCC Builder's Insurance Premium receipt, or Owner Builder Insurance Number / permit certificate.		
4.	1 copy of the Portable Long Service Leave Levy (Qleave) receipt. (Projects valued at \$150,000 or more).		
5.	1 copy of the Site Plan showing the location of the new building in comparison of any other structures on the site and distances to boundaries and/or other features		
6.	1 copy of each level of a floor plan.		
7.	1 copy of the elevation plan showing natural ground level and finished ground level.		
8.	1 copy of a cross section through the dwelling.		
9.	1 copy of a plan of dimensioned floor slab and details showing all building elements and their location.		
10.	1 copy of bracing calculations for each level.		
11.	1 copy of connection and tie down schedules or details.		
12.	1 copy of a timber framing schedule.		
13.	1 copy of a floor framing details.		
14.	1 copy of Energy Efficiency requirements and building sustainability details in accordance with the BCA and QDC MP4.1.		
15.	Engineers Design Certification (Form 15) if the structure has steel members, or provide the manufacturer's details with Engineer Certification. Construction methods.		
16.	1 copy of the Soil Investigation/ Classification Report		
17.	1 copy of footing/slab design.		
18.	Retaining wall detail (if greater than 1m high – Engineer Certified).		
Plumbing applications			
19.	Completed Form 1—Compliance assessment application for plumbing, drainage and onsite sewerage work		
20.	Percolation Test Report and Effluent Design.		
21.	1 copy of the Soil Investigation/ Classification Report		
22.	Three (3) Plumbing/Drainage Plans.
